Release Date for "Call of Duty: Black Ops 3" Leaked The official Call of Duty social media page confirmed today that the new DLC Pack that will be released in August 2015 will have an introduction that reveals the release date of the next installment of the "Call of Duty" series. The game for Xbox One, Playstation 4 and PC will be released on September 13 in North America, and on September 14 in Europe. The DLC is going to be called "Advanced Warfare," and will cost \$14.99. The announcement was made by Michael Condrey, head of development at Sledgehammer Games on Twitter, where he also asked fans to have patience and stay tuned for more info. I mean, really, can't they wait for a little more time? The question has been asked by the players, who have demanded a more "innovative" game, but Sledgehammer Games seems to be ruling out that possibility. In the meantime, check out the official trailer below. COD, "Advanced Warfare", will be the sixth installment of the "Call of Duty" series. We can't wait for this game to be released! Q: How to print object to commandline in Haskell? I have a 'type' in Haskell like this: data Text a = Text String a deriving (Show) That I would like to convert to a 82157476af
